- Develop working software that meets business requirements
- Available for support
- Work with team and management to complete sprint commitments
- Develop applications on company selected technologies
- Design metrics and monitor the performance of existing systems
- Create, maintain and automatically execute unit tests
- Develop features within policy guidelines

### Minimum requirements:

- Related qualification e.g. degree or diploma
  - Computer science/Information technology/Engineering
- The following experience will be advantageous
  - Java, HTML, REST
  - Cloud computing
  - AWS

- Requirement gathering

## INTERPERSONAL SKILLS

- Self-Motivated
- Excellent communication skills
- Teamwork
- Ability to work independently/autonomously
- Prioritization skills
- High attention to detail

## DETAILS

- Location: Offices located in Rosenpark, Durbanville, Cape Town.
- We work on a part time remote basis.
